MESSAGE FROM HEAD OF EDUCATION

Dear ISCS Community,

At ISCS, we place great importance on German as one of our core subjects. We offer a comprehensive curriculum across the whole school. In Early Years, students enjoy four German language lessons per week, as well as having two teachers present in every session – one speaking in German to reinforce ideas while the lead teacher instructs in English.

From Year 1 to Year 11, students follow one of four levels we offer in each year group – Beginners, Intermediate, Advanced, or Native – ensuring that every learner receives the right level of challenge and support to make steady progress.

Students can also pursue IGCSE First and Second Language German, A Level German, and Goethe C1 Accreditation preparation, opening doors to universities in Switzerland and abroad.

Learning German goes far beyond the classroom. Our students experience the language in Forest School, through educational trips, and in daily interactions. Just today, Year 10 visited the National Museum in Zürich, bringing the language and culture to life.

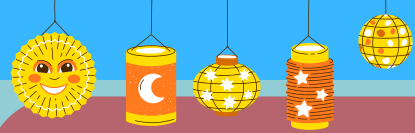

Mastering German supports not only academic growth, but also integration into the local community and valuable future networking opportunities.

I would like to extend my heartfelt thanks and congratulations to the German Department, led by Ulrike Sauer, for their exceptional work and dedication. Danke schön!

I wish everyone a lovely weekend.

Warm regards,

Mr. Soto.

Learning about and celebrating Räbeliechtli in German Classes
This week in German classes across Primary, students learned about the Swiss tradition of Räbeliechtli. They explored the history of the festival, sang songs, and carved traditional turnip lanterns. A big thank-you to the PTO for planning this event and giving our students the opportunity to experience this unique part of Swiss culture.

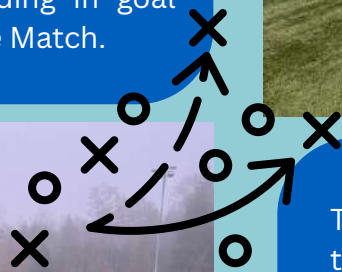

Räbeliechtli is a Swiss autumn tradition where children carve lanterns from turnips (Räben) and carry them in evening processions, singing songs as they light up the dark. The celebration marks the change of seasons and symbolizes warmth and community as winter approaches.

Wolves U13 & U16 Football Teams Take on the International School of Rheintal at home game. A huge well done to the Wolves U13 and U16 teams who faced the International School of Rheintal this week!

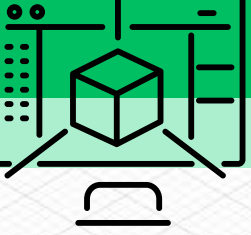

The U13s — made up mostly of Year 7 and 8 pupils — played their very first match together and showed impressive determination. Despite limited training as a team and the challenge of stepping into a competitive game, they gave it their all. Dylan was outstanding in goal and earned Player of the Match.

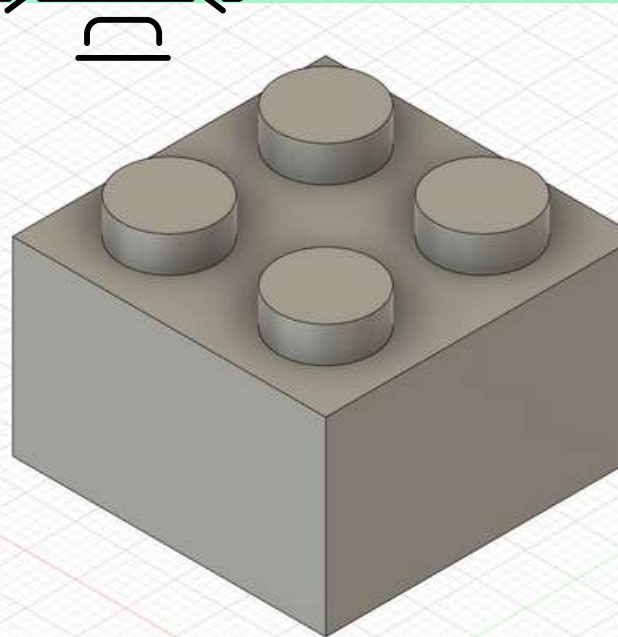

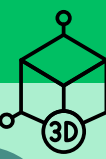

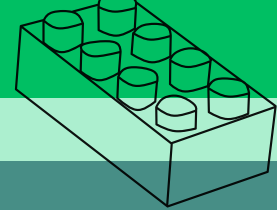

The U16s, with a little more experience and stronger teamwork, put on a great display of skill and strategy. Their well-coordinated play paid off with a close but well-deserved victory, winning by 6-4. Charlie's sharp performance earned him Player of the Match. Amazing Charlie! ⚽

A special shout-out also goes to Ben and Andrea from Year 12, who took on the roles of referee and assistant coaches and did a fantastic job supporting both teams.

Go Wolves! 🐾

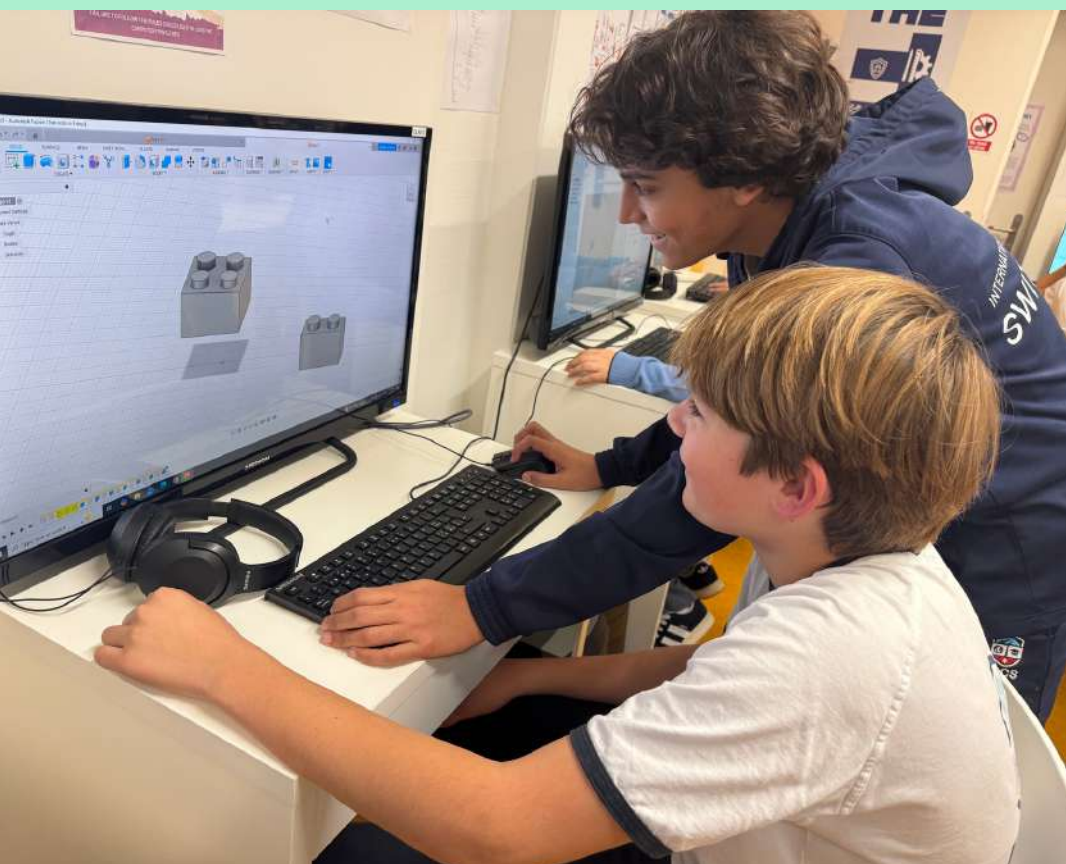

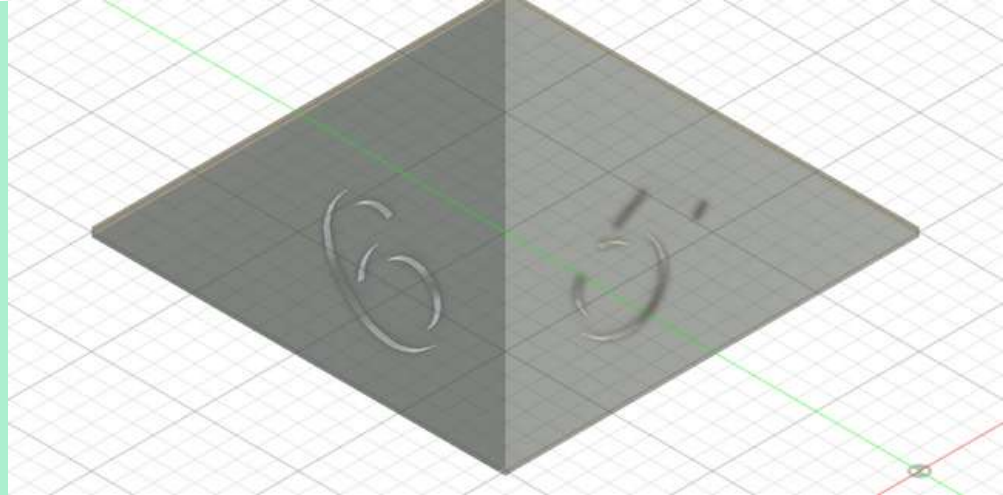

MIDDLE SCHOOL

Year 9 – Exploring Professional 3D Design with Fusion 360

In Computer Science, our Year 9 students have embarked on an exciting journey into the world of professional 3D design using Fusion 360 by Autodesk. This powerful design software, widely used in industries such as engineering, architecture, and product development, allows students to experience real-world digital creation.

Through these lessons, students are learning to transform their ideas into precise 3D models, developing both their technical and creative thinking skills. The project also highlights the cross-curricular importance of mathematics, as students apply geometric concepts, accurate measurements, and spatial reasoning to ensure their designs are both functional and realistic. This hands-on approach helps them see how Computer Science, design, and math work together to solve real-world challenges.

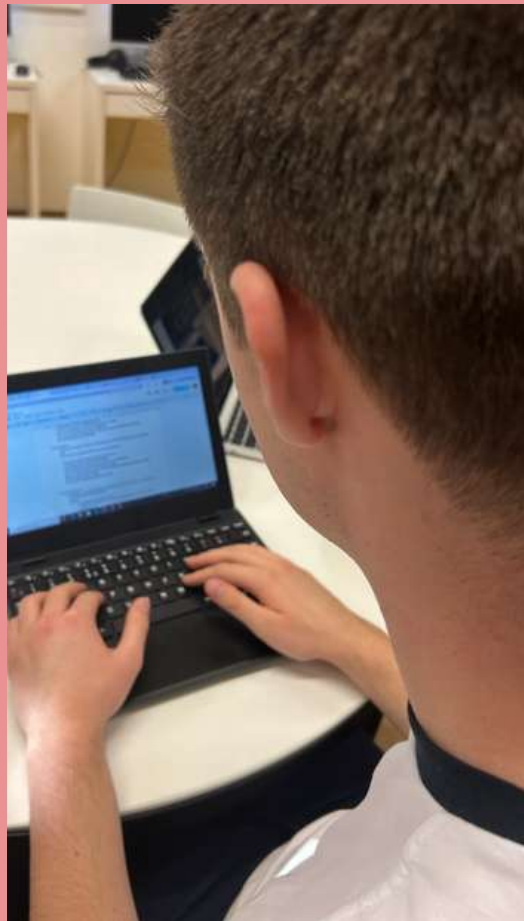

EXAM!

HIGH SCHOOL

Years 11 & 12 – Preparing for Exams with Confidence

As we move further into the term, Year 11 and Year 12 students are turning their focus to exam preparation. Year 11 students are getting ready for their IGCSE Computer Science MOCK exams, while Year 12 are preparing for their AS Level assessments.

Mr. Alvarez is guiding students through targeted revision sessions, practice papers, and topic reviews to strengthen their understanding of programming, algorithms, and computational thinking. It's also a timely reminder of the importance of starting exam preparation early—consistent study habits and steady revision are key to building confidence and achieving strong results.

Morning Coffee

You are invited to
a
**COFFEE
MORNING**

MONDAY 10th NOVEMBER

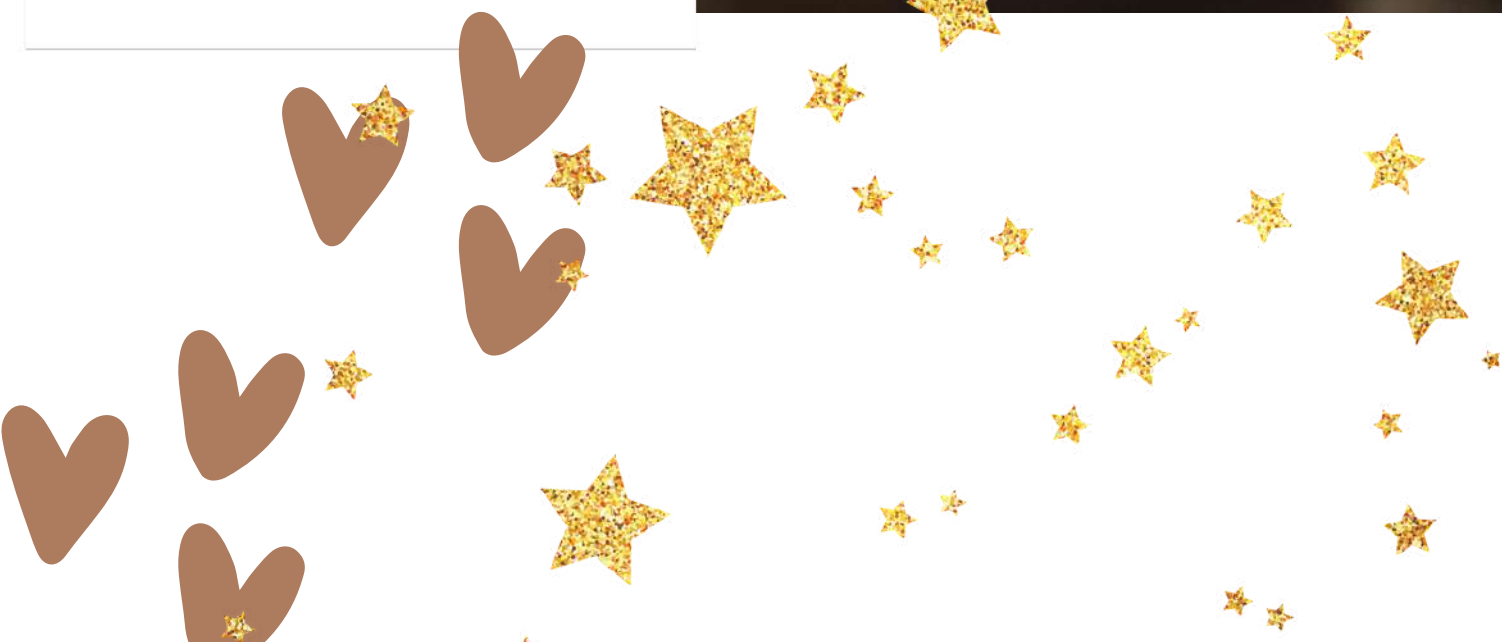

from 8:30 to 10:00 am at ISCS café

**Primary parents, please pass by after
attending the open morning with your
children and celebrate kindness with them.**

Secondary parents, please join us any time!

**It will be a great chance to meet each other, raise
awareness about bullying and discuss events and
projects we would like to put in place with your support.**

Kindness is like coffee
It awakens your spirit
&
improves your day
Fill your cup with both
